Julie,

I'd be glad to call. Let me know when and what number.

Vic

ject:

Victor - Thanks for the update on the report.

All - I'm a little confused about who is on what team and the total configuration of the FRTG. These are new names.

Can someone please call me this morning to discuss?

Thanks,

Julie

Julie,

I forgot to add that the Mass Balance summary report is in review. One reviewer has signed off and I am waiting for the second.

Vic

---

Julie,

Bill Courtwright and David Absher were not part of the Mass Balance Team, so I have no information on them. The Team membership is:

Victor Labson, Chair, and Roger N. Clark, Gregg A. Swayze, Todd M. Hoefen, Raymond Kokaly, K. Eric Livo, Michael H. Powers, Geoffrey S. Plumlee, and Gregory P. Meeker, all of USGS. They bring remote sensing, geophysical, geochemical and geologic expertise to the accounting.

Victor,

Sorry to bug but have two questions for you:

1. Who was on the Mass Balance Team?
2. Were Bill Courtwright and David Absher part of the Mass Balance Team? If so, do you have 2 – 3 sentences on what their role is at MMS and what expertise they brought to the team?

Thanks.

Julie

**Subject:** RE: Preliminary Mass Balance Summary

Julie,

I will try to get this through review this weekend. I think we have now collected all the Team members' comments. The process is editing, peer-review and revision, copy editing, Director's approval, JIC approval, release. I'll stay on top of this.

Marcia,

Please let me know when you want this to go public. Victor mentioned that it is still in draft form but we need to get it out sooner rather than later.

Thanks,

Julie

**Subject:** Preliminary Mass Balance Summary

Julie,

Here is the preliminary summary of the Mass Balance estimation. We are fact checking and pinning down the sources, mostly NIC as it turns out. This obviously is not ready to go out.
