Yes - fUnding. :)

It would be helpful to have a status report from David Behler, Pam and Karen Baker on where the issue stands: when they will have the issue resolved, and what management support the need from you, and what staff support they might need from me/Martha.

Thanks!!

Catherine -

Thanks for your hard work on nailing down the time line and for determining that funding (rather than finding, right?) is the critical path. What can I do to help with this? Whose action item is this? Is this somehow being hung up in the transfer of the funding from MMS to the USGS?

Marcia

Subject: FRTG timeline

The timeline now has input from all the team leads except for the Peer Review Team.

A response from the Peer Review team is respectfully requested ASAP.

The timeline clearly indicates that determining how to find the academics is the FRTG's highest priority. Delay of resolution of the funding issue directly impacts the ability of the FRTG to deliver the

final report.

Thank you team!
