

## How Peer Review Teams will work

Cesnik, Catherine M o 'Darren.Mollot@HQ.DOE.GOV'

---

Marcia,

Darren and I spoke today.

We discussed that since the sub teams (nodal, plume, etc.) already include groups of peers, that their numbers could be considered peer reviewed. Thus that would eliminate the need for duplicate subteams to peer review each subteam. That would leave Bill Rees doing an "overall" peer review of all of the subteams.

Is this what you were envisioning?

Thank you!

Catherine

**Subject:** Re: FRTG timeline

Marcia & I spoke on this already.

What is needed is a 2 step review. The first scrub needs to be complete this week: the results of the analysis, the initial review, and the analysis team response to the review need to all be complete in next 10 - 15 days. All this will be presented to the Sr. Review panel. After an iteration (if needed), then the result of both analysis and review will be presented to the Sr. Gov officials involved (cabinet level). Marcia will lead and present the analysis, I will lead and present the review.

Would ask that Darren and Catherine sort out who is doing the initial analyses and reviews and let Marcia & me know their plan.

Thanks  
Will

**Subject:** RE: FRTG timeline

Catherine,

Spoke and emailed Bill but have yet to close with him on which of us are responsible for what. Got the impression (perhaps wrongly) on our brief call that he may be handling all of the peer reviews – Bill, please let me know how you want to handle – I'm fine with any approach. BTW there is no "e" in "Mollot". Thanks

Darren

**Subject:** FRTG timeline

The timeline now has input from all the team leads except for the Peer Review Team.

A response from the Peer Review team is respectfully requested ASAP.

The timeline clearly indicates that determining how to find the academics is the FRTG's highest priority. Delay of resolution of the funding issue directly impacts the ability of the FRTG to deliver the final report.

Thank you team!

Catherine
