Catherine,

The Reservoir Modeling Team's timeline looks correct ~ one to two weeks after research is initiated. We have two groups estimating one week; we would forward these results to the Nodal Analysis Team immediately upon completion while a third group continues work beyond 7 days if needed. This will keep things moving. Thank you.

Subject: FRTG timeline

The timeline now has input from all the team leads except for the Peer Review Team.

A response from the Peer Review team is respectfully requested ASAP.

The timeline clearly indicates that determining how to find the academics is the FRTG's highest priority. Delay of resolution of the funding issue directly impacts the ability of the FRTG to deliver the final report.

Thank you team!

Catherine
