History: This message has been replied to.

Marcia: Lori and Mark have drafted the paragraph below for your consideration. We'd like some version of this to be emailed to all the members of the FRTG. As soon as possible. This will give Mark the credentials to reach out to the team members, to MMS, and others to ensure coordination. We should copy David, Laura, and Brian on the email to the FRTG.

Thanks, and let me know if you have any questions or want to discuss further.

Anne

As you know, there are myriad efforts underway in support of the efforts of the Flow Rate Technical Group. Things are evolving rapidly, and there are lots of moving pieces. I want to ensure that our efforts are coordinated and consistent. Mark Sogge (Chief of Staff, USGS Western Region) is joining the team and will serve as my deputy. Mark will be in touch directly with subteam leaders to ensure that all of the FRTG efforts and status are coordinated. Please copy Mark on all emails sent to me; he will be taking charge on logistics and should be kept in the loop on decisions being made by each subteam, including contracting decisions in support of our efforts. Mark should also be kept apprised of draft reports/estimates, and all proposed public communications should go through him. Mark will coordinate with Lori Caramanian and the legal team, so please advise him when legal issues arise so that he can flag them appropriately. Please continue to keep Lori in the loop too for purposes of ensuring that we are developing an appropriate record in support of the FRTG's work. As always, thanks to everyone for all the hard work you're doing. Mark's support will be invaluable in this effort, and I'm glad to welcome him to the team.
