---

These look great to me. It's in all of our "best interests" to get this out!

See some suggested changes below, knowing the personalities of this group. It is all about them. They don't view that they work for us. They won't do anything because we ask them to do it. They will only do it because they think it is in their best interests.

Marcia

**Subject:** Mark Sogge to serve as Deputy to Marcia McNutt as Leader of Flow Rate Technical Group  
Marcia: Lori and Mark have drafted the paragraph below for your consideration. We'd like some version of this to be emailed to all the members of the FRTG. As soon as possible. This will give Mark the credentials to reach out to the team members, to MMS, and others to ensure coordination. We should copy David, Laura, and Brian on the email to the FRTG.

Thanks, and let me know if you have any questions or want to discuss further.

Anne

As you know, there are myriad efforts underway by the Flow Rate Technical Group. Things are evolving rapidly, and there are lots of moving pieces. To help me coordinate all of our work and respond to your needs. Mark Sogge (Chief of Staff, USGS Western Region) is joining the team and will serve as my deputy. Mark will be in touch directly with subteam leaders to introduce himself to you. Please copy Mark on all emails sent to me; he will be taking charge on logistics and should be kept in the loop as decisions are made by each subteam, including contracting decisions in support of our efforts. Mark should also be kept apprised of draft reports/estimates, and all proposed public communications should go through him. Mark will coordinate with Lori Caramanian who has access to legal advice, so please advise him when legal issues arise so that he can get you answers quickly. Please continue to keep Lori in the

loop too - she'll do her best to keep track of the FRTG's work. As always, thanks to everyone for all the hard work you're doing. Mark's support will be invaluable in this effort, and I'm glad to welcome him to the team.
