Except that I believe Browner said that the FRTG generally thinks that 20% more oil may come out... we'll need to check what she said.

FYI: Deanna just called and said CNN has a mike in Marcia's face saying they have information that the FRTG reports an increase due to riser-cutting. It is not true and Marcia wanted ok to say FRTG has not put out any information on flow rates related to this action. I told her ok.
