Subject: IMMEDIATE ATTENTION: Do you need new video of current flow?

Importance: High

Marcia, Bill -

Two BP Engineers just came by asking if the Plume Team needed any new high-res video, now that the pipe has been cleanly cut and visibility is very good. They mentioned being able to reposition the remote vehicles for better views, etc. There may be only a short window of time before a next stage.

I do not know if new video falls within your current needs or priorities. What response would you like me to convey to them?

Mark
