Bill,

In light of the change in the situation, are we to work on an estimate of the flow out of the end of the drilling raiser during the past few weeks or are you to redirect our efforts to estimating the flow currently coming out of the top of the BOV?

Thanks, Pedro

Hello everyone

I just had a telephone inquiry from the Wall Street Journal
Question: "... looking at the pictures, the spill rate seems to be much higher. Do you have a new estimate?"

My answer: " The FRTG is working on it, and we will have a conference call on Monday. It would be prudent to wait till after that."

Regards

Ömer
