Hi Marcia,

How do you want us to work with the flow data we have? I got back last night and Rich will be in this afternoon. Folks here, U GA, JHU and MIT have taken a whack at the data and it looks good so far. I think it will take a few days to come to internal consensus and write up the results. Should we pass this to the CG and then to your flow working group (which BTW we have not really heard from at all which seems strange)? Let me know.

FYI, we did get some plume data post-riser removal yesterday AM before we left.
