Dear Colleagues,

I thank you for the honor to serve in your company.

In the way of introduction, I submit the following biographical information in case Bill might like to include it alongside the others.

Dr. Antonio Possolo is Chief of the Statistical Engineering Division at NIST (U.S. Dept. of Commerce). He is a statistician (PhD, Yale University) specializing in the evaluation of measurement uncertainty, and in statistical models for spatio-temporal phenomena. His previous experience includes sixteen years in industry (Boeing, General Electric), and seven years in academia (Princeton University, and University of Washington in Seattle).
