Subject: "Q&A 3331-3333" has been assigned to you.

Task URL:

<http://hqsms-spweb-001:115/ACO-A/Lists/NIC%20Tasker%202/DispForm.aspx?ID=488>

Description:

**BACKGROUND:** Following CAPT Lloyd's testimony at the hearing, above staff cornered Mr. Helton (NOAA Witness) and CAPT Lloyd (CG Witness) and began asking questions about current flow-rate projections. Both NOAA & CG maintained that info was promulgated from and with transparency through FRTT, however staff appeared to imply that there are other independent or other contracted flow-rate estimates than what have been currently published - and these are not being made public or sufficiently transparent.

**ASSIGNMENTS:**

(NIC-HQ) Q&A #3331: Please provide the most recent flow-rate estimate promulgated from NIC/FRTT and the date of that estimate.

(NIC-HQ) Q&A #3332: Was this estimate following the completion of the current top-hat/vented containment system? If not, is there an anticipated timeline or estimate forthcoming on a new estimate?

(NIC-HQ) Q&A #3333: Is the NIC or FRTT aware of any independent or contracted flow-rate estimates outside of their own work? If so, by whom - and please comment on the FRTT's evaluation of these estimates as appropriate.

Due Date: 6/10/2010 9:00:00 AM

Status: Not Started

Status Notes: "  
Tasked to IASG as per CDR Offutt.  
"
