Guys,

Wao! What a mess.

In the video TOPHAT_06-03-10_16-17-57.avi what is...:

1. White Crystals in the black jet = hydrates?
2. Why two jets?
3. Why one jet is lighter than the other?
4. What is the exterior diameter of the flange (i.e., outside the bolt ring)? (for scale purposes)
5. Are you guys doing PIV above, after the two jets join?

Thanks, Pedro
