Bill -

I spoke with Ken Salazar this morning. He would like to briefly call in on Sunday afternoon to thank the team for their great work and invite them to come to DC as soon as they are done to personally present their results to the Secretary on Tuesday. (If that timing makes sense.)

Can you please let Joan know a good time (EDT) and number that the Secretary can use to reach us? Thanks!

Marcia

Please let me know the time that KLS needs to call in for any meetings this weekend. And when you give me time, let me know what time zone we are starting from so I get the right time. Thank you. Joan
Please keep my cell also: [REDACTED]

All is good. Marcia and her science team meet in Seattle Sunday to review information. The revised flow rate number will be developed. I will call into the meeting.

I will then get Marcia and Secretary Chu together to arrive at one official estimate range of flow.

Ken
