Subject: Speaking with the Plume Team of the FRTG

Admiral Allen:

Most members of the Plume Team of the FRTG will be assembled in Seattle later today to come to some consensus on the post-riser-cut flow rate. It appears to me from my correspondence so far with Bill Lehr, chair of the Plume Team, that there are two ideal windows of time that would work best for you to conference in to speak with the team. I am sure that they would really appreciate hearing from you as the group is chartered under the Coast Guard and reports to you.

One possibility is 3 pm Pacific Time, 6 pm East Coast time. We have a conference line that will be using earlier in the day that we would reactivate at that time for your use. The number is 866 459-5232 access code .

The other possibility would be for you to call later in the evening right after Secretary Salazar calls in when we are gathered at Dr. Lehr's house for dinner. The Secretary is calling in at 6 pm Pacific, 9 Eastern. Phone number is .

Do let us know if either option works for you, and as I say, I know that the team will appreciate hearing from you. They have been working long hours on their own time as volunteers to get these estimates. The vast majority of them have behaved honorably and shown excellent judgement personally and professionally in a highly charged atmosphere.

Thanks for taking the time to speak with them.

Marcia
