Thanks Steve. Mark Sogge and Deanna Archuleta have had further conversations about this, so please check in with Mark.

Hello Anne,

Catching up on today's e-mail. We'll work to get this request in to the IRSCC.

Steve

Vic, Steve, and Mike:

Marcia and I have talked about getting updated AVIRIS imagery to allow the mass balance team to make a new estimate of the volume of oil on the sea surface. It's this oil that will ultimately pose a problem for response and cleanup if/when it makes landfall. We have agreed that we'd like to request that the IRSCC task another set of NASA/AVIRIS overflights, the data from which could be used for a new estimate. Vic knows exactly what will be needed. Can you get this rolling? Thanks for your help.
