Marcia,

Martha already requested an audio bridge, for 12 people, for 8:00 - 12:00 Central. Should have the info tomorrow. If you think we will need more lines, let us know.

Thanks so much for checking, Troy. I will look into a call-in line tomorrow and let you know. I just found out about the meeting myself this afternoon, so sorry for the short notice.

Marcia

Subject: RE: meeting early Monday

After speaking to Lars Herbst, MMS will not have any geologist/geophysicist/reservoir personnel available in Houston for Monday Morning. However, If we can set up a conference call we could have some folks call in.

Thanks

Troy Trosclair

Marcia,

We can have Phil Nelson here. I will let him know right away.

Subject: meeting early Monday

Mark -

There is going to be a meeting here early Monday morning led by Trevor Hill, along with flow and pressure analysts from the National Labs, to review information on what is known about hydrocarbon flow in the well. This seems to be the most important information that the USGS geologists will need to know for their work. Any chance we can get some or all of them here for that meeting?

Don - any chance you or someone from the FRTG's reservoir team could be here or participate via conference call?

Troy - can any of the MMS geologists be here?

Marcia
