Subject: USGS hydrologist recommendation

Dear Marcia and Mark:

As promised, I talked to Steve Ingebritsen (who is now in Alaska) about the work of this committee and the need to get a world-class hydrologist on board ASAP. Although Steve is not available until next Monday (as you know), he strongly recommended Paul Hsieh for this position. Paul is extremely highly regarded for his work in ground water hydrology, especially the role of fractures in fluid flow, and has a strong geomechanical background as well.

Although we have not talked to Paul about this and hence do not know if he is available, both Walter and I agree that adding Paul to our team would be a very wise move. The next move is up to you. Paul can be reached at 650-329-4580, pahsieh@usgs.gov

best regards,

Steve
