The best USGS person is Keith Kvenvolden, USGS retired. I have his email address in my computer and will try to dig it out before my plane takes off. On rental car shuttle now. A second choice is Carolyn Ruppel at USGS-WH. Keith did the methane inventory for the GoM in 2003.

Carolyn Ruppel

Subject: USGS methene expert needed

NOAA has asked for USGS to provide a expert to evaluate the methene bubbles in the Gulf. The contact would be used as a resource to brainstorm or help answer questions.. NOAA would like a name by noon today. Because of the fast turnaround time, I suggest we provide either David Applegate or Debbie Hutchinson as a place holder until we can determine what the effort may entail.
