

RE: USGS request for log copies

Marcia K McNutt o Mark K Sogge

07/06/2010 11:18 PM

Mark -

I think that our requests for BP data are supposed to be coordinated officially through Margie. Sorry if I wasn't clear on that. It is the way that we did the requests last time around.

Subject: USGS request for log copies

Cindy,

Thank you for your past help to our USGS Well Integrity Team. As you know, their work continues in a meeting here in Houston this week. For use in that meeting, we would greatly appreciate if you could provide us two sets of the following logs (at 1 inch per hundred feet):

BP1 -- composite well log, lith, and mud log (Combo Log, TVD scale) to 18,320 ft

BP1 -- LWD and open-hole well logs to 18,320 ft

MC252-2 -- composite well log, lith, and mud log (Combo Log, TVD scale) to 12,030 ft

MC252-3 -- composite well log, lith, and mud log (Combo Log, TVD scale) to 11,900 ft

MC252-3 -- LWD logs (TVD Correlation Log) to 15,200ft

Thank you very much.

Mark

Subj: Request for log copies
ect:

Marcia (Mark) --

Last Thursday I received copies of logs at 1 inch per hundred feet from BP Geoscience staff for

BP1 -- composite well log, lith, and mud log (Combo Log, TVD scale) to 18,320 ft
BP1 -- LWD and open-hole well logs to 18,320 ft
MC252-2 -- composite well log, lith, and mud log (Combo Log, TVD scale) to 12,030 ft
MC252-3 -- composite well log, lith, and mud log (Combo Log, TVD scale) to 11,900 ft
MC252-3 -- LWD logs (TVD Correlation Log) to 15,200ft

Walter will be in Houston this Thursday and Friday and will need these log prints.
Can BP run another set for him?
We should each have a copy in Denver and Menlo anyway and these presentations are quite useful and very difficult for us to duplicate.

I have copied Cindy Y on this email, not being sure of protocol for such a request.
