MEMORANDUM

To:

From: Bureau Security Manager

Subject: USGS National Security Information Clearance Recertification

NAME:

LEVEL:

DATE OF RECERTIFICATION:

INVESTIGATION/DATE/CASE NO.:

The U.S. Geological Survey (USGS) issued a recertification of a national security information clearance under Executive Order 10450 and Executive Order 12968 for the above-named individual. This clearance will permit access to information classified for reasons of national security only.

This clearance certification does not authorize access to Sensitive Compartmented Information (SCI). If the individual currently does not have SCI access, but requires SCI access, a separate briefing will be provided at a later date by the SCI briefing officer. After the briefing, a separate notification will be provided by the Security Management Office. A Federal Personnel Payroll System (FPPS) action to change the position sensitivity designation to special-sensitive will need to be initiated at that time. Specific instructions regarding your responsibility in this process can be found at <http://internal.usgs.gov/ops/hro/securi/index.html>. Questions should be directed to the servicing personnel office.

If this clearance certification is a downgrade from an SCI to a collateral Top Secret only, an FPPS personnel action to change the position sensitivity of the individual will need to be initiated at this time.

A copy of this certificate will never be provided to the subject.

Using Section A on the reverse side of this form, forward a copy of this clearance recertification to the subject's official supervisor of record who will orally inform the subject that the awarded security clearance level was recertified.

The subject's official supervisor of record should report any significant changes affecting the status of the subject's clearance to their Regional Security Officer, alternate, or **designee(s)**, who must then notify the Security Management Office of these changes by using Section B on the reverse side of this form. Also, whenever the Security Debriefing Acknowledgment, SF-312, is executed, it must be forwarded to the Security Management Office for inclusion in the subject's case file.
