

**Telecommunications Component**

FFS Tracking	Allocation Org (4-digits)	Standard Identifier (2-digits)	Component Specific (1-digit)	FSG Code (2-digits)	Cost Center Example	Explanation
IWP Number	XXXX	0A	D	N/A	8582-0AD	0AD = Telecommunication (fund code 4556D)
Parent Account	XXXX	0A	D	58	8582-0AD58	FSG Code 58 is specific to the Telecommunications Component
Subaccount	XXXX	0A	D	XXXXX	8582-XXXXX	The last 5-digits of the subaccounts can be left to the cost centers discretion. When establishing subaccounts in the FFS SPRJ Table, there is a separate field that must contain the parent account number. This allows for multiple subaccounts that will roll to the single parent. This will give cost centers flexibility for organizing who would be contributing to a specific plan etc. The parent account is the account that actually receives funding and appears on the 286 reports.

**Equipment Component**

FFS Tracking	Allocation Org (4-digits)	Standard Identifier (2-digits)	Component Specific (1-digit)	FSG Code (2-digits)	Cost Center Example	Explanation
IWP Number	XXXX	0A	E	N/A	8582-0AE	0AE = Equipment (fund code 4556E)
Parent Account	XXXX	0A	E	XX	8582-0AE23	These two digits would vary depending upon type of equipment investment plan a cost center had. All Equipment FSG Codes are 2-digits in length and the WCF handbook contains a listing of all valid codes. For this example, 23 is a vehicles FSG code.
Subaccount	XXXX	0A	E	XXXXX	8582-XXXXX	The last 5-digits of the subaccounts can be left to the cost centers discretion. When establishing subaccounts in the FFS SPRJ Table, there is a separate field that must contain the parent account number. This allows for multiple subaccounts that will roll to the single parent. This will give cost centers flexibility for organizing who would be contributing to a specific plan etc. The parent account is the account that actually receives funding and appears on the 286 reports.

**Publications Component - (this example is not addressing Geology Publications)**

FFS Tracking	Allocation Org (4-digits)	Standard Identifier (2-digits)	Component Specific (1-digit)	FSG Code (2-digits)	Cost Center Example	Explanation
IWP Number	XXXX	0A	P	N/A	8582-0AP	0AP = Publications (fund code 4556P)
Parent Account	XXXX	0A	P	80	8582-0AP80	FSG Code 80 is specific to the Publications Component
Subaccount	XXXX	0A	P	XXXXX	8582-XXXXX	The last 5-digits of the subaccounts can be left to the cost centers discretion. When establishing subaccounts in the FFS SPRJ Table, there is a separate field that must contain the parent account number. This allows for multiple subaccounts that will roll to the single parent. This will give cost centers flexibility for organizing who would be contributing to a specific plan etc. The parent account is the account that actually receives funding and appears on the 286 reports.

**Publications Component - Geology Publications ONLY**

FFS Tracking	Allocation Org (4-digits)	Standard Identifier (2-digits)	Component Specific (1-digit)	FSG Code (2-digits)	Cost Center Example	Explanation
IWP Number	XXXX	0A	P	N/A	8582-0AP	0AP = Publications (fund code 4556P)
Parent Account	XXXX	0A	P	XX	8582-0APXX	Last two digits will be left for the cost centers to decide and will allow flexibility for tracking individual publication plans
Subaccount	XXXX	0A	P	XXXXX	8582-XXXXX	The last 5-digits of the subaccounts can be left to the cost centers discretion. When establishing subaccounts in the FFS SPRJ Table, there is a separate field that must contain the parent account number. This allows for multiple subaccounts that will roll to the single parent. This will give cost centers flexibility for organizing who would be contributing to a specific plan etc. The parent account is the account that actually receives funding and appears on the 286 reports.

**Facilities Component**

FFS Tracking	Allocation Org (4-digits)	Standard Identifier (2-digits)	Component Specific (1-digit)	FSG Code (2-digits)	Cost Center Example	Explanation
IWP Number	XXXX	0A	F	N/A	8582-0AF	<b>0AF</b> = Facilities (fund code 4556F)
Parent Account	XXXX	0A	F	XX	8582-0AFXX	Facilities FSG codes are specific to each facilities investment plan and are longer than the two digits that the field dictates (an example WYBLDG). Because of this, the last two digits will be left for the cost centers to decide.
Subaccount	XXXX	0A	F	XXXXX	8582-XXXXX	The last 5-digits of the subaccounts can be left to the cost centers discretion. When establishing subaccounts in the FFS SPRJ Table, there is a separate field that must contain the parent account number. This allows for multiple subaccounts that will roll to the single parent. This will give cost centers flexibility for organizing who would be contributing to a specific plan etc. The parent account is the account that actually receives funding and appears on the 286 reports.
